For 23 years, a passion for travel led me to work in the U.S.A, U.K, Southeast Asia, China, the Middle East, Africa and South America. This diversity in life and therapeutic perspectives resulted in an eclectic approach to patient care, with a strong focus on identifying the root cause of dysfunction.

Working with minimal resources in developing countries and in foreign languages necessitated the development of keen observational and manual skills to identify and treat causes of dysfunction. Understanding that the body is a representation of a person's habits, injuries, usage, temperament and genetics, I place a strong emphasis on carefully listening to each client and to attentively assessing their bodies' tension patterns. Each session involves individualized treatment to address the causes of dysfunction within the body systems. I also focus on tailoring home exercise programs and teaching self-management strategies to holistically support a person's quest for wellness.

It is my heartfelt desire to effectively collaborate with clients in an effort to find viable solutions to their health and wellness challenges.
